

Recurrent Coastal Flooding Sub Panel Update - October 4, 2013

Dear Sub-Panel Members, Technical Experts and Partners,

Apologies for any duplicate messages.

Please find attached the minutes from the 9/25/13 SCP Recurrent Flooding Sub-Panel meeting along with Ms. Mitchell's presentation on the [VIMS Recurrent Flooding study](#). Many of the studies and materials discussed during the meeting are hyperlinked in the document.

Additional apologies for the file sizes attached; we are working with Veterans Affairs and Homeland Security to establish a site aligned with the [Secure Commonwealth Panel site](#) to begin posting materials.

Lastly, we're thankful to those who have logged onto Alfresco to review our working documents and provided feedback. If you haven't already done so, I encourage you to accept the Alfresco invitation and review at your earliest convenience. (If you have not received an invitation, or you would like to offer another name/email address to access the documents, please let me know). Again, we respectfully request your feedback by Friday, October 11.

Thank you for your partnership and have a great weekend!

Jim
